Clipboard Viewer Crack + License Keygen Download [2022-Latest]

===== Are you looking for an easy and simple way to view your clipboards? With Clipboard Viewer, you can easily create a list of copied text, images, and URLs that can be opened with just a click. It offers a very intuitive interface, with a variety of contextual options that can easily allow users to view information and organize items in a better way. Features of Clipboard Viewer ===== Easy to use It's easy to use, and you'll enjoy it! Just create a new file and start copying text from one window to another one, then paste it to a clipboard in order to send the text to the Clipboard Viewer window. File format You can save any data you copied to the clipboard as a new file in any format, as you want. Drag & drop And it's even easier! Just drag any file to the Clipboard Viewer window and it will be opened with the data you want. Copy URL (Google Docs, Microsoft Word, etc.) As usual, you can copy a URL from the web, too, and it will be treated as a file. Customize the window You can easily change the size of the window, to allow full use of the screen space. Duplicate and close tabs You can duplicate tabs to create a new one, and close others to keep only one window. Supported file types You can save any file in any format that you want to, such as .txt, .csv, .doc, and .xls, just to mention a few. Reverse Paste When you have a URL, you can easily paste it in the Clipboard Viewer window, and it will be opened with the data copied. You can also drag&drop any data to the Clipboard Viewer window. Multiple clipboards You can open as many clipboards as you want, and you can save data from any of them to a new one. Use the Search field You can search for the file or data you are looking for, and it will be open with it. Shortcuts The CTRL+SHIFT+N shortcut opens a new file, and CTRL+SHIFT+P opens a new clipboard. Easy to use with other tools You can open any file in the Clipboard Viewer window with other applications, like notepad, gedit, or any other. Look inside any file You can open any file
